## Fort Hays State University

► <http://scholars.fhus.edu>

- Electronic Theses
- Undergraduate / Graduate Research
- Journals, Newsletters, Events
- Faculty Research (Faculty peer-reviewed journal articles)
- Open Educational Resources
- University Archives & Special Collections

# Institutional Need for an IR

- ▶ What is an IR?
  - ▶ Collecting, preserving & disseminating scholarship
  - ▶ Publish & showcase institutional scholarship
- ▶ Role of an IR
  - ▶ Manage open access to digital content produced by the university
  - ▶ Encourages knowledge sharing
  - ▶ Permits quick and easy dissemination of scholarship across institutions

# Gold vs Green OPEN ACCESS

## ► Gold Open Access

Gold or “pay” to publish Open Access

- Articles is made freely accessible online to anyone anywhere immediately upon publication
- Authors, their funders or institution pay an article publication charge for every article published

## ► Green Open Access

“Self-Archiving”

- Depositing a **free** copy of a digital document on the internet in order to provide open access to it
- Access without payment to a version of the publication via a repository, often after an embargo period.

# Institutional Repositories - Why we need them...?

- ▶ Showcase scholarly works
- ▶ Create a public forum
- ▶ Maximize research impact through searching
- ▶ Manage & preserve digital collections
- ▶ Increase professional visibility

## Benefits:

- ▶ Broader dissemination & increased access
- ▶ Supports faculty/student success

# Why bepress™ Digital Commons?

## What can Digital Commons do?

### Institutional Repository Platforms

▶ Digital Commons

▶ Dspace

▶ Eprints

▶ Fedora

▶ Islandora

### Positive benefits for middle to small institutions

- ▶ Customer support
- ▶ Intuitive interface
- ▶ Cloud-based
- ▶ Preservation - LOCKSS
- ▶ Unlimited number of items
- ▶ Statistics (Google Analytics)

Abstract  
A greater abundance of shrubs in semiarid grasslands affects the spatial patterns of soil temperature, moisture, and litter, resulting in fertile islands with potentially enhanced soil metabolic activity. The goal of this study was to quantify the microsite specificity of soil respiration in a semiarid riparian ecosystem experiencing shrub encroachment. We quantified the response of soil respiration to different microsite conditions created by big mesquite shrubs (near the trunk and the canopy edge), medium-sized mesquite, sycamore bunchgrasses, and open spaces. We hypothesized that soil respiration would be more temperature sensitive and less moisture sensitive and have a greater magnitude in shrub microsites compared with grass and open microsites. Field and incubation soil respiration data were simultaneously analyzed in a Bayesian framework to quantify the microsite-specific temperature and moisture sensitivities and magnitude of respiration. The analysis showed that shrub expansion increases the abundance of mesic microsites, which in turn increases the magnitude of soil respiration.

**Facile Synthesis and Electrochemical Analysis of Cobalt Sulfide Nanostructures for Supercapacitor Applications**

[Download](#)

Included in  
Chemistry Commons

**Esam Alqurashi, Pittsburg State University**

**Date of Award**  
5-2015

**Document Type**  
Thesis

**Degree Name**  
Master of Science (MS)

**Department**  
Chemistry

**Abstract**  
The main objective of the thesis is to understand the effect of morphologies and electrolytes on the electrochemical properties of cobalt sulfides. The nanostructured cobalt sulfides were synthesized by a facile hydrothermal method. For this, cobalt nitrate  $\text{Co}(\text{NO}_3)_2 \cdot \text{H}_2\text{O}$ , cetyl trimethylammonium bromide (CTAB), thioacetamide (TTA), poly (vinyl pyrrolidone) (PVP) and ethylene glycol were used. The effect of growth parameters such as solvent and presence of surfactants on the size and morphology of the cobalt sulfides were investigated. It was observed that these variations could provide cobalt sulfides with a range of sizes, shapes and morphologies. The nanostructured cobalt sulfides were structurally and electrochemically characterized using various techniques. The structural characterizations were performed using X-ray diffraction (XRD) technique. The XRD analysis showed mixed phases of cobalt sulfides such as  $\text{CoS}$  and  $\text{CoS}_2$ . The morphology and size of the cobalt sulfides were studied using scanning electron microscopy (SEM). It was observed that the morphology and the size of the cobalt sulfides depend on the growth conditions. The crystallite size of the cobalt sulfide was estimated using XRD data. Energy-dispersive X-ray spectrometer (EDS) was used to further confirm the cobalt sulfide formation.

**Description**

The Republic of Plato is one of the classic gateway texts into the study and practice of philosophy, and it is just the sort of book that has been able to arrest and redirect lives. How it has been able to do this, and whether or not it will be able to do this in your own case, is something you can only discover for yourself. The present guidebook aims to help a person get fairly deep, fairly quickly, into the project. It divides the dialogue into 96 sections and provides commentary on each section as well as questions for reflection and exploration. It is organized with a table of contents and is stitched together with a system of navigating bookmarks. Links to external sites such as the Perseus Classical Library are used throughout. This book is suitable for college courses or independent study.

## Facial Recognition of Dark Triad Traits and the Link to Prenatal Androgen Exposure

Taylor Willits, Fort Hays State University  
Arianne Fisher, Fort Hays State University

Department  
Psychology

Additional Mentor  
Dr. Trey Hill

### Description

The Dark Triad is a personality construct composed of psychopathy, Machiavellianism, and narcissism that is commonly associated with a variety of undesirable behaviors. High prenatal androgen exposure has been associated with various behavioral and personality characteristics also commonly found in individuals high in the Dark Triad. This may suggest a link between prenatal androgen exposure and the development of the Dark Triad. Additionally, previous research has found that the faces of individuals high in the Dark Triad are able to be identified at rates significantly better than chance. This identification may indicate evolutionary benefits associated with facial recognition of Dark Triad traits, particularly within the realm of mating. A total of 66 students were shown a slideshow with composite faces of individuals high and low in psychopathy, Machiavellianism, narcissism, intrasexual competition, and short- and long-term mating. Participants were asked to mark which face was most expressive of each trait on a 6-point scale. They completed the Dirty Dozen measure of the Dark Triad, and their 2D:4D ratios were also measured. Our hypothesis that individuals high in the Dark Triad would be better at identifying high Dark Triad faces was not supported. However, in accordance with evolutionary advantages, females high in the Dark Triad were worse at identifying males high in long-term mating, and narcissistic males were better at identifying females high in short-term mating. No relationship between low 2D:4D ratio (indicating higher prenatal androgen exposure) and the Dark Triad traits was found.

Economic growth and development

The screenshot shows the Cornell University ILR School website. The header includes the Cornell University ILR School logo and navigation links: Home, About, My Account. Below the header is the Digital Commons@ILR logo and the tagline "advancing the world of work". The main content area is titled "Selected Works of Vernon M Briggs Jr". On the left, there is a search bar with the text "Enter search terms:" and a "Search" button. Below the search bar is a dropdown menu labeled "in this repository". Further down are links for "Advanced Search", "Notify me via email or RSS", "Links", "Catherwood Library", and "Browse" (Collections, Disciplines, Authors). The "Selected Works of Vernon M Briggs Jr" section features a grid of author profiles. The first profile, Vernon M Briggs Jr, is circled in green. A green arrow points from this profile to a larger, more detailed view of his Selected Works on the right. Other authors in the gallery include Stuart Basefsky, Rosemary Batt, Bradford S Bell, Marya Besharov, John H Bishop, Vanessa K. Bohns, and George R. Boyer.

even as part of each publisher's copyright transfer agreement.

# Faculty Participation

- ▶ Encouraging faculty to add their scholarship
- ▶ Faculty promoting undergraduate & graduate research
  - ▶ Class papers / projects
  - ▶ Research Colloquium
- ▶ Outreach
  - ▶ Workshops
  - ▶ Tutorials/Guidelines
  - ▶ Professional Development Day presentation
  - ▶ Informational brochures

# Conclusion

- ▶ Showcase research produced by the university community
- ▶ Digital collection building
- ▶ Access to digital collections
- ▶ Use of IR materials
- ▶ Long-term preservation

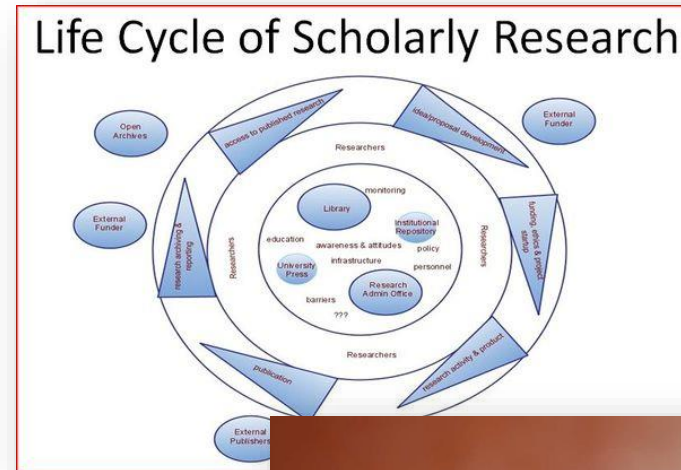

- Understand aspects & challenges of IR initiatives

- Supporting the cycle of

- Knowledge
- Discovery
- Use
- Creation
- Dissemination
- Faculty & Student Research

- Collaboration between the Library and Campus Departments
